

Linkific AI/ML Internship — Onboarding & Guidelines

Notice: Synthetic demonstration document created for RAG API experimentation.

Section 1: Workstation Setup & Environment

Incoming interns must configure their local development workstation within the first 24 hours. The approved software stack requires Python version 3.10 or higher, Visual Studio Code, Git, and Jupyter Notebook. All core dependencies including NumPy, Pandas, Scikit-learn, Hugging Face Transformers, and PyTorch must be installed and verified. Git credentials must be configured with the intern's official name and email address.

Section 2: Daily Schedule & Working Hours

The standard internship working schedule is Monday through Friday, from 9:30 AM to 6:30 PM Indian Standard Time (IST). Each working day begins at 10:00 AM with the morning task briefing and objectives release. Interns are required to maintain at least 85% attendance across the internship duration.

Section 3: Task Submission Guidelines

All daily technical tasks must be completed and submitted by 6:00 PM IST each evening. Deliverables must be organized inside dedicated day folders containing an executed Jupyter Notebook, standalone Python script, comprehensive README, outputs directory, and genuine screenshots. Evening review meetings commence at 7:00 PM or 8:00 PM IST with technical mentors (Suyash Sir / Aditya Sir) or HR (Rebecca Mam).

Section 4: Leave Policy & Notification

Interns requiring planned leave must submit a formal written request via email to both their technical mentor and HR coordinator (Rebecca Mam) at least 24 hours in advance. For medical emergencies, notification must be sent before 10:00 AM on the day of absence. Missed technical modules must be completed during designated compensatory weekend catch-up sessions.
