

LINKIFIC TECHNOLOGIES — EMPLOYEE HANDBOOK

Document ID: DOC-PDF-001 | Version: 2026.1

1. Core Collaboration Hours and Culture

All engineering team members collaborate actively between 10:00 AM and 5:00 PM IST.

We value deterministic code, rigorous automated testing, and comprehensive documentation.

2. Remote Work and Tool Provisioning

Engineers are provisioned standard cloud development environments and authorized tools.

3. Function Calling and Tool Chaining Standards

Autonomous agents must utilize validated tool registries, defensive type checking, and structured error envelopes (ToolResult) to prevent unhandled runtime crashes.

4. Security and Data Protection

Strict directory traversal prevention and query parameterization must be enforced at all times.
