SHRI SANJAYKUMAR V

Vellore, India | +91 6369945011 | v.shrisanjaykumar@gmail.com | LinkedIn | GitHub

Technical Skills

Programming	Python, Java, C++, C, JavaScript, TypeScript, SQL
Core CS	Data Structures & Algorithms, Object-Oriented Programming, System Design, Distributed Systems
Software Engineering	FastAPI, REST APIs, Microservices, Pydantic v2, PyTest, SDLC, Agile/Scrum, CI/CD, Software Testing, Debugging, Git/GitHub
Cloud & DevOps	AWS (EC2), Microsoft Azure (VMs, NSG), Docker, GitHub Actions, Linux, SSH
AI & Emerging Tech	Generative AI, RAG, Vector Search, Semantic Search, Agentic AI, scikit-learn, Isolation Forest, Explainable AI (XAI), Prompt Engineering, OpenAI API, SAP Generative AI Hub SDK, GitHub Copilot

Experience

Linkific Aug 2026 – Oct 2026

AI/ML Software Engineering Intern – Financial AI & Explainable ML *GitHub Portfolio*

- **Developed** FinDoc-AuditEngine, a FastAPI reference prototype for Accounts Payable auditing combining deterministic **3-Way Reconciliation (Invoice–PO–GRN)** with a **7-feature StandardScaler + Isolation Forest** anomaly scoring pipeline.
- **Implemented** regex-based pre-inference **PII masking** (PAN, Aadhaar format, bank account, phone, email), local **single-feature perturbation attribution,** and an interactive web workbench supporting dual-currency (USD/INR) inspection.
- **Authored** modular **Pydantic v2** cross-field schema validators, structured domain exception handlers, and automated **PyTest verification suites** with GitHub Actions CI workflows across 30 AI/ML internship modules.

TForce India Private Limited May 2026 – Jul 2026

Software Engineering Intern – Generative AI

- **Engineered** enterprise Generative AI workflows and RAG pipelines using **Python, SAP BTP, and SAP Generative AI Hub SDK,** enabling context-grounded retrieval for domain-specific queries.
- **Integrated** AI components into backend microservices through **RESTful API patterns,** supporting cross-system interoperability and modular service isolation.
- **Executed** Python-based testing and evaluation scripts to analyze workflow performance, response latency, and system stability through iterative validation.

Projects

LEGITIFY – Security & Compliance Analysis Platform

Python, DevSecOps, AppSec, GitHub API | GitHub

- **Engineered** an automated security platform to analyze source-code repositories and detect configuration vulnerabilities using secure coding and DevSecOps practices.
- **Automated** policy-driven compliance workflows to flag security issues across repository assets, improving audit repeatability and execution speed.

CampusLLM – Personalized University Assistant

Python, Next.js, React, RAG, Vector Search, OpenAI API | GitHub

- **Architected** a RAG assistant combining vector embeddings, semantic search, and intelligent query routing for source-grounded, source-cited responses from university documents.
- **Optimized** retrieval and web-fallback strategies, achieving **approximately 3-second average end-to-end latency** across the response pipeline.

FinTrack – Personal Finance & Group Settlement Platform

Python, React, Node.js, Firebase, REST APIs | Live Demo

- **Architected** a modular full-stack platform with **REST APIs and real-time state synchronization across 5+ modules,** enforcing service isolation for maintainable application design.
- **Optimized** a graph-based debt-settlement algorithm for multi-party transactions and integrated the OpenAI API for spending-pattern analysis and natural-language insights.

Solar Energy Forecasting

Python, scikit-learn, XGBoost, LSTM, NASA POWER API | GitHub

- **Built** an end-to-end machine-learning pipeline and benchmarked 5 models—Linear Regression, Random Forest, XGBoost, Gradient Boosting, and LSTM—using MAE and RMSE for systematic model selection.
- **Engineered** multivariate weather features from the NASA POWER API and automated 7-day forecasting across data acquisition, preprocessing, model training, evaluation, and prediction.

Education

Vellore Institute of Technology, Vellore Aug 2023 – Present

M.Tech Integrated in Software Engineering **CGPA: 9.12/10.0**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, System Design, Distributed Systems, Database Systems, Computer Networks

Certifications

Cloud Infrastructure Certified AI Foundations Associate	Oracle
Agentic AI Certified Foundations Associate	Oracle
Software Engineer Role Certification	HackerRank
SQL (Advanced) Skill Certification	HackerRank
Java (Basic) Skill Certification	HackerRank

Leadership & Extracurriculars

Vice Chairperson & Core Member, VIT Health Club 2024 – Present

*Led "Hack the Hospital" with **600+ participants,** coordinating workshops, teams, stakeholders, timelines, and deliverables.*

Purchase Manager & Sponsorship Team, Riviera & Gravitas Tech Festivals, VIT 2025 – Present

*Secured **INR 60+ lakhs** in sponsorships; managed procurement, sponsor deliverables, negotiations, and cross-functional coordination.*
